ALLOGRAFTS**

THE REVOGEN DIFFERENCE

At RevoGen Biologics we are committed to making lives better through cutting-edge biologics. Following time-tested rigorous guidelines and delivering quality products and services to our clients is our number one goal. We are dedicated to providing the highest-quality biologics products throughout the United States.

We offer our services to the medical community and patients in order to improve quality of life. Our products meet the highest statutory, professional and legislative requirements. Through new processes and many advances in biotechnology, **RevoGen is revolutionizing bioregeneration to offer the highest quality biologics in the market to our physicians for their patients.**

RELATIONSHIPS

At RevoGen Biologics we understand the need for stringent donor screening, rigorous procedures, and the highest quality tissues, but we also know the importance of relationships. In addition to providing high quality products, we want to make sure that our clients have the most optimal experience throughout their interaction with RevoGen Biologics. When problems do arise, we will work with our physicians to resolve the issue quickly and efficiently. We want to set industry standards in product quality as well as customer relationships.

**RevoGen representatives
pride themselves on
building relationships
that will be serviced
around the clock.**

TISSUE PROCESSING

RevoGen Biologics and our strategic partners follow rigorous guidelines and procedures to preserve allografts for their intended use. The allograft tissue recovery process begins after a prospective donor has passed our stringent screening process. Highly trained technicians operate in state-of-the-art designated clean rooms to process and prepare donor tissue. Our dedicated team is committed to providing the highest quality allograft tissue available and our thorough screening process is designed to ensure only uniform, high-quality donor tissue is recovered and processed for distribution.

SPORTS MEDICINE

Sports medicine physicians often deal with highly active patients that are accustomed to a fast-paced physical lifestyle.

Whether a seasoned NBA player or an amateur golfer, RevoGen products will aid in their recovery and ignite the hope of returning to the passion for the sport they enjoy. Surgeons prefer our robust, non-irradiated soft tissue grafts when performing procedures and repairs on patients of all ages and levels of activity. Our PasCo2 soft tissue grafts guarantee the highest level of sterility for our patients without the traditional use of irradiation.

REVOGEN BIOLOGICS PRODUCT LIST

DESCRIPTION	REVOGEN CATALOG NUMBER
SPORTS MEDICINE	
RB1000	
Achilles Strip FF (PASCO)	RBA1002FF
Achilles Tendon FF (PASCO)	RBA1004FF
Gracilis Tendon FF (PASCO)	RBA1006FF
Patella Tendon Hemi FF (5.0 & Down) (PASCO)	RBA1009FF
Patella Tendon Hemi FF (5.1 & Up) (PASCO)	RBA1010FF
Peroneus Longus FF (PASCO)	RBA1012FF
PreShaped Achilles Tendon FF (PASCO)	RBA1014FF
PreShaped Patella Tendon FF (PASCO)	RBA1016FF
Semitendinosus Tendon FF (PASCO)	RBA1018FF
Semitendinosus/Gracilis Combo FF (PASCO)	RBA1020FF
Tibialis Tendon FF Anterior (PASCO)	RBA1022FF
Tibialis Tendon FF Posterior (PASCO)	RBA1024FF

DONOR SCREENING AND RECOVERY

RevoGen Biologics and our strategic partners go to great lengths when screening, recovering, processing, storing and distributing donor tissue. It is our common goal to treat each donor and their families with the utmost respect and to maximize the benefit for our allograft tissue recipients.

When screening donors and recovering tissue, the highest standards must be upheld. Each prospective donor is put through a comprehensive screening process, including medical and social history evaluations that are in accordance with Food and Drug Administration (FDA) regulations and American Association of Tissue Banks (AATB) standards. Upon receiving

consent from the donor's family, qualified personnel perform and document a physical examination of the prospective donor.

Following the physical examination, a full review of the donor's medical records is then performed. Finally, if the prospective donor is approved, the donor tissue is then tested by a CLIA certified, FDA-registered laboratory.

These tests include, but are not limited to the following:

- Anti-HBc
- Anti-HCV
- Anti-HIV Type 1 & 2
- HBsAg
- HIV-1 and HCV (NAT)
- Syphilis

PASCO₂ TECHNOLOGY

The revolutionary PASCO₂ sterilization process is a new and improved way to sterilize allograft tissues. This new, advanced process allows for sterilization without the use of irradiation. The process relies on supercritical carbon dioxide to extract and remove unwanted compounds from soft tissue.

Using an optimal balance of pressure and temperature, the allograft tissue is prepared to help facilitate a problem-free tissue transplant. The PASCO₂ process maximizes the biocompatibility and mechanical integrity in donor tissue and does not jeopardize the tensile strength and elastic properties of the connective tissue. The PASCO₂ process is excellent for use in sports medicine and other soft tissue allografts.

QUALITY ASSURANCE

RevoGen Biologics' goal is to serve our patients and physicians with the highest quality biologics products available. Along with our strategic partners, we adhere to strict policies and detailed standard operating procedures in all facets of the donor screening and tissue recovery process. Frequent policy updates assure that all procedures are current with all applicable standards and regulations. Routine quality assurance audits are performed on all processes and procedures, both internal and external.
